Thank you for joining the information session. Please read this quick tutorial on connecting to audio and disabling your webcam during the session.
When you log into WebEx you will see this window. For the audio connection leave it on “Call Using Computer” for the video click on the down arrow and select “No Video” then click on green button to “Connect to Audio” (it may take a moment for the button to turn green)
If you accidentally turned the camera on you can turn it off by clicking on the camera icon on the Participants list. **Blue** is on **Grey** is off.
If for some reason you do not have audio. Locate the **Quick Start** tab on the top left of the meeting window. The options for audio connections will be the first icon on the left. Click on “More Options” to see all the available options.

Using computer for audio is the best option followed by call me and then I will call in.
